**Invitation to our Spring Event on Saturday, April 8, 2006**

**“Traffic Control Center” and Annual General Meeting**

Saturday, April 8, 2006  
10.00 am

“Big brother is watching you”. This becomes more and more true for car drivers. In order to manage the daily traffic flow, a highly complicated surveillance system is giving immediate alarms to the police if a traffic jam, an accident or a fire emergency requires measures. While we don’t notice it, it is the basis for safety on the road - and the basis for a smooth flow of traffic. For sure this tour will bring a highly interesting insight view behind the stage of the police. We are very fortunate to receive this tour during “non-office-hours”. The presenter will give us his explanations in German, but we will have – if needed – translation into English.

After the tour we will have lunch nearby, followed by the AGM.

**Schedule**

- 10.00 am  
Visiting the Traffic Control Center. Nordstrasse 44, Zürich

- 12.00 am  
Lunch at the Hotel Krone Unterstrass (2 minutes walking distance)

- 13.30 am  
AGM at the Hotel Krone Unterstrass

The tour starts at 10am. Please be there ahead of time. We will meet at the entrance region inside the “Verkehrsleitzentrale” (see the map on the back of this sheet). We hope this event catches your interest and you will also be with us for the AGM to give us your feedback. Please sign up before end of March through email, phone or mail.

Looking forward to seeing you!

Donald Tillman, President  
079 757 74 25

**SIGN UP before end of March:** (name, number of persons, cell phone number)
