Summer Send Off Event in Berlin
Saturday August 8, 2009
5pm - 9pm
at the Biergarten

MIT Summer Send Off Events are held by MIT clubs and local parents for students who have enrolled at MIT and will be heading there in August. These events are an excellent opportunity for these students to meet and network with MIT current students as well as with members of the MIT alumni community in Germany.

So come and meet with your MIT fellows!!!
If you want to attend, send an email to: mtchikhaoui@hotmail.com
Or call Reinhard: 0175-294.7841 or Mohamed: 0173-219.6339

Payment on individual basis

Best regards and hope to see you soon
The Organizing committee

Dr. Reinhard Gessner / Mohamed Chikhaoui
Anfahrt

If you come by public transportation, you can take the train, S-Bahn, U-Bahn or Bus to "Zoologischer Garten". Please leave the train station on its Eastern side, turn left and walk North along the train tracks that run on a viaduct. You will cross the parking lot "Hardenbergplatz", leave the Zoo main entrance to your right and proceed on the trail labeled "Stadtbahnbogen".

Go straight North. After a 10 min walk, you will automatically run into the "Schleusenkrug" on your left. (See the translucent yellow circle on the Google Earth Map on page 3 below).

Alternatively you can get off the S-Bahn one stop further North ("Tiergarten"), turn South, cross over "Straße des 17. Juni" and enter the park just East of the train viaduct. Follow the trail straight South, leaving the viaduct always on your right side (don't turn East - you may get lost in the park). After less than 5 min walk, climb some shallow stairs and cross over two bridges (labeled "Unterschleuse"). The "Schleusenkrug" will be on your right just after the second bridge.

If you come by car, you should never ever try to get a parking spot next to the train station "Zoologischer Garten", but drive directly via "Ernst-Reuter-Platz" eastwards into to "Straße des 17. Juni". Look for a parking space on the right side of the street a soon as you have passed underneath the train viaduct. Take the trail next to the viaduct southward and follow it to the "Schleusenkrug" as described in the preceding paragraph.
